

# MATHEMATICS TEACHING

## Index to Issues 26 - 33 (1964-65)

Issue 26, Spring 1964  
 Issue 27, Summer 1964  
 Issue 28, Autumn 1964  
 Issue 29, Winter 1964

Issue 30, Spring 1965  
 Issue 31, Summer 1965  
 Issue 32, Autumn 1965  
 Issue 33, Winter 1965

In this list articles are grouped chronologically under the following headings: 1. **Primary Mathematics**, 1.1. Apparatus; 2. **Secondary Mathematics**, 2.1. Algebra, 2.2. Geometry, 2.3. Calculus and Topology, 2.4. Applied Mathematics, 2.5. Film and Television; 3. **Learning Mathematics**; 4. **General**, 4.1. Conference Reports.

The reference gives bulletin number, year of publication and page numbers. Thus 28 (1964) 32-37 refers to the article on pp. 32-37 of bulletin no. 28 issued in 1964.

The abbreviations m. for 'mathematics' and derived words is used throughout.

### 1. Primary Mathematics

- J. Clark: Calculating device for teaching elementary arithmetic. 26 (1964) 10-13.  
 P. H. Elliott: Materials for early concepts of weighing and measuring. 29 (1964) 17-19.  
 J. R. Shelley: Math. workshop for children. 27 (1964) 21-24.  
 H. Bracewell: Using water. 27 (1964) 37-39.  
 R. Maull: The primary teacher and the new m. 28 (1964) 29-31.  
 T. H. F. Brissenden: Learning games in m. 28 (1964) 51-67.  
 R. J. Peachery: Primary school project. 29 (1964) 51-53.  
 L. G. Buxton: Order and structure at primary level. 30 (1965) 27-28.  
 D. Ross: M. in education of young children. 31 (1965) 7-14.  
 L. G. Buxton: An approach to space for the primary child. 31 (1965) 23-27.  
 P. Evans: M. and the camera. 31 (1965) 53-54.  
 P. Pethen: Primary m. in relation to trends in primary education. 32 (1965) 35-38.  
 P. Taylor: Subtraction. 33 (1965) 31-34.  
 D. J. Farnham: Madison project in an English primary school. 33 (1965) 37-41.

#### 1.1 APPARATUS.

- J. D. Williams: Structa apparatus. 26 (1964) 32-35 and 27 (1964) 53-58.  
 M. Lowenfeld: Poleidoblocs. 29 (1964) 5-15.  
 I. Macfarlane Smith: Psychological case for using structural apparatus. 30 (1965) 7-10.  
 G. B. Jeffrey: An approach to structural apparatus. 30 (1965) 63-64.

### 2. Secondary Mathematics.

- J. H. D. Parker: Colour in secondary school m. 26 (1964) 29-31.  
 E. A. Blacklee: Have you tried any of these? 26 (1964) 47-48.  
 D. H. Wheeler: Examining for the C.S.E. 26 (1964) 59-60.  
 R. Parker: M. miscellanea. 27 (1964) 61-64.  
 C. Birtwistle: A level—S.M.P. decides. 28 (1964) 39-40.  
 R. S. Scorer: Purpose in applied m. 29 (1964) 17-26.

- M. G. Hughes: New approach to pure m. in sixth form. 29 (1964) 27-29.  
 R. Owen: On exams. 29 (1964) 33-36.  
 J. Howard and D. St. J. Jesson: Experimental approach to modern m. teaching. 30 (1965) 12-15.  
 A. G. de Mesquita: Modern m. for engineers and scientists. 30 (1965) 17-20.  
 J. Mold: M. with fourth year leavers. 30 (1965) 49-51.  
 M. J. Holt and A. J. McIntosh: M. course for arts specialists. 32 (1965) 7-12.  
 D. Last: What do they know? 33 (1965) 25-30.

#### 2.1. ALGEBRA.

- P. J. Hilton: Arithmetic as part of m. 27 (1964) 15-19.  
 D. Fielker: Vector spaces for secondary modern children. 29 (1964) 65-69.  
 L. Feldman: Questions about a product and its factors. 30 (1965) 43-46.  
 T. J. Fletcher: Modulo two puzzles. 31 (1965) 28-31.  
 M. Bruckheimer and N. W. Gowar: Introduction to complex numbers. 31 (1965) 32-34.  
 R. Owen: Milk bottles to linear equations. 31 (1965) 35-38.  
 H. Wright, P. Brett, et al.: Groups. 32 (1965) 15-20.  
 D. Fielker: Matrices for mods. 32 (1965) 67-71.  
 A. G. Sillitto: A teaching approach to the definition of a group. 33 (1965) 54-57.

#### 2.2. GEOMETRY.

- G. Edgcombe: Moiré bands. 26 (1964) 21-28.  
 W. Servais: Dilatations. 26 (1964) 51-55.  
 G. Giles: Tessellations. 27 (1964) 47-52.  
 J. H. D. Parker: Reviewing area. 28 (1964) 21-27.  
 G. Edgcombe: A versatile tessellation. 28 (1964) 46-48.  
 R. M. Fyfe: Beginning trigonometry. 29 (1964) 55-57.  
 W. Servais: Metrical geometry. 30 (1965) 21-26.  
 A. Z. Krygowska: Teaching geometry in to-day's 'unified m.' 30 (1965) 53-57, and 31 (1965) 15-22.  
 M. Jeger: The present conflict in reform of geometry teaching. 32 (1965) 22-32.

#### 2.2.1. MODELS.

- S. R. N. Smith: A model of the bi-variate normal distribution. 27 (1964) 10-14.

### 2.3. CALCULUS AND TOPOLOGY.

- H. B. Griffiths: Topology. 27 (1964) 25-36; 28 (1964) 58-65 and 29 (1964) 41-49.

### 2.4. APPLIED MATHEMATICS.

- B. Mastrantone: A pegboard computer. 26 (1964) 43-44.  
 D. C. Haines: A simple mechanical binary adder. 26 (1964) 44-45.  
 H. Reinstein: A hydraulic binary adder. 26 (1964) 45-47.  
 G. Giles: Electrical circuits for binary adders. 28 (1964) 32-37.  
 G. J. Flanagan and L. Molynoux: A system of logic to aid in teaching m. 30 (1965) 37-42.  
 M. Meredith: The case for calculators. 31 (1965) Supp. 3-5.  
 E. McDonald: Computing by calculating machine. 31 (1965) Supp. 7-10.  
 P. M. Hopkins: Calculators with a secondary remedial class. 31 (1965) Supp. 14.  
 C. Birtwistle: Calculators—and review list. 31 (1965) 17-31.  
 A. Wilkinson: A small computer demonstration model. 31 (1965) 41-48.  
 A. Wilkinson: Computer logic demonstration board. 32 (1965) 60-65.  
 D. Woodrow: Life in suburbia. 33 (1965) 13-15.  
 R. F. Watson: Solution by computer. 33 (1965) 16-20.

### 2.5. FILM AND TELEVISION.

- J. Cain: M. on television—a producer's view. 32 (1965) 41-48.  
 Reports—the other side of the screen. 32 (1965) 49-53.

- H. S. Wylie: Glasgow schools' closed-circuit television. 33 (1965) 8-11.

- C. Gattegno: M. and imagery. 33 (1965) 22-24.

### 3. Learning mathematics.

- R. R. Skemp: The psychology and m. project. 26 (1964) 5-9.  
 J. K. Backhouse: A test on the concept of momentum. 26 (1964) 15-16.  
 D. H. Wheeler: Dienes on the learning of m. 27 (1964) 40-44.  
 J. D. Williams: Barriers to arithmetic understanding. 28 (1964) 15-18.  
 D. H. Wheeler: Teaching for understanding. 33 (1965) 47-50.

### 4. General.

- H. East: M. for educationists. 26 (1964) 55-56.  
 W. Wynne Wilson: Cheaper by the dozen. 26 (1964) 62-64.  
 I. G. Macdonald: The gap between m. research and teaching. 27 (1964) 5-8.  
 W. M. Brookes: Facilities and services for teachers of m. 32 (1965) 56-58.  
 Birtwistle, Fletcher, Gattegno: Ten years of M. Teaching. 33 (1965) 3-7.  
 A. J. Markushevich: Reform in school m. 33 (1965) 58-62.

### 4.1. CONFERENCE REPORTS.

- E. McDonald: A.T.M. Birmingham, 1964. 28 (1964) 5-11.  
 A.T.M. West Wickham, 1965. 32 (1965) 55-58.

Easibind binders are available to take the full eight issues of this volume, from *Mathematics Teaching*, Vine Street Chambers, Nelson, Lancs. Bound in maroon leathercloth with the title *Mathematics Teaching* in gold on the spine, the price is 13s. post free.
